

SAHIL BODKE

Boston, MA | sahil2000bodke@gmail.com | (551)-344-8413 | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software Engineer with experience building Python APIs, cloud-native data pipelines on AWS and Azure, and AI/ML workflows. Background in containerization, CI/CD, and distributed systems through multiple co-ops and full-time roles

EDUCATION

Northeastern University (Khoury College of Computer Sciences), Boston, MA	Sept 2022 – Dec 2024
Master of Science in Robotics (Concentration: Computer Science)	GPA 3.96/4.0
National Institute of Technology Silchar , Assam, India	July 2018 – May 2022
Bachelor of Technology – Mechanical Engineering	GPA 8.98/10.0

TECHNICAL SKILLS

Programming Languages:	Python, R, C++, JavaScript, Java, MATLAB, Groovy
Cloud & DevOps:	Azure, AWS (EC2, Lambda, S3, Batch, Sagemaker, Bedrock, Fargate, ECS, EFS, FSX, EBS, ECR), Serverless, Docker, GitHub, GitHub Actions, GitLab, CI/CD, NGINX, Linux
Frameworks & libraries:	PyTorch, TensorFlow, Keras, OpenCV, NumPy, Pandas, Nextflow, Dash, Figma
Web Technologies:	FastAPI, Svelte, React, Node.js, Express.js, Mongoose, REST API, HTML, CSS, Bootstrap, TypeScript
Databases:	MySQL, MongoDB, PostgreSQL, Athena, RDS, DynamoDB, DuckDB
AI & Other Tools:	MCP, Claude Code, Cursor, Windsurf, Kiro, Git, Tableau, VS Code, Postman, ROS

EXPERIENCE

Long Health, USA (Software Engineer)	Feb 2026 - Present
- Building AI-powered document intelligence system using AWS Textract OCR, RAG, and LLMs to extract structured patient information and generate summaries from unstructured records for physician workflows - Designed LLM prompt-based pipeline processing 500+ patient records/day, reducing structured data errors by ~30% and cutting manual physician review time by more than 90%	
UniBio Intelligence, USA (Software Engineer)	July 2025 – Feb 2026
- Designed and built backend services, APIs and features using Python (FastAPI) to support scalable computational workflows on Azure, enabling researchers to execute computational workflows through stable, containerized APIs - Implemented batch processing and dependency-aware workflow orchestration, coordinating multi-step execution across distributed services and reducing failure rates and manual intervention - Integrated Model Context Protocol (MCP) into existing OpenAPI services, migrating legacy workflows to MCP-based implementations - Deployed containerized services via CI/CD pipelines cutting release cycle time and eliminating environment-specific deployment failures	
Ampersand Biomedicines, Boston, USA (Machine Learning Engineer Co-op)	Feb 2025 – July 2025
- Operated and automated cloud-based compute pipelines for large-scale biological data processing with an emphasis on reliability and reproducibility - Built containerized batch workloads on AWS for long-running jobs, improving fault tolerance and recovery - Automated environment provisioning using Python and AWS tooling, eliminating recurring manual steps and improving pipeline reliability for large-scale biological data processing jobs - Partnered with researchers and engineers to balance delivery velocity with production stability	
Ampersand Biomedicines, Boston, USA (AI/Data Engineering Co-op)	Jan 2024 - Aug 2024
- Architected cloud-native data pipelines using Docker, AWS services, and workflow automation tools - Optimized distributed processing jobs to reduce memory usage and operational cost by 50%	

PROJECTS

API Development Using Python (FastAPI, PostgreSQL, Docker, NGINX, JWT, GitHub Actions, Ubuntu)	July 2023
- Built a production-grade REST API using FastAPI and PostgreSQL, integrating JWT authentication and role-based access - Implemented CI/CD pipelines using GitHub Actions for automated build, test, and deployment workflows - Containerized application using Docker and configured NGINX reverse proxy for deployment stability - Deployed on Linux-based systems with configuration-driven environments	

ACHIEVEMENTS & CONTRIBUTIONS

- Co-authored and presented research on **A Fish Robot: It's Modeling and Pose Estimation** at the [2021 International Symposium of Asian Control Association on Intelligent Robotics and Industrial Automation \(IRIA\)](#)
- Teaching Assistant** for **Programming with Data** course assisting students with assignments and labs across **2 semesters**
- Recipient of **'Assistance to Meritorious Students Scholarship – Junior Level'** for outstanding academic performance

COURSES & CERTIFICATIONS

AWS – AI Practitioner | Algorithms | Neural Networks and Deep Learning | Natural Language Processing | Pattern Recognition and Computer Vision | Human Computer Interaction
